Mr. Tom Chivers
General Manager
Western Clay Company
P.O. Box 1067
Aurora, Utah 84620

Dear Mr. Chivers:

Re: Annual Report, Redmond Limestone Quarry, M/041/004, Sevier County

Thank you for taking the time to familiarize us with Western Clay Company's mining properties during our recent site visit. Please accept my apologies for this belated reply.

As per our discussion, I have enclosed a copy of the Division's updated annual report form (Form MR-AR). As you can see, the form has been considerably shortened compared to the previous version. Please return the completed form along with an updated project map. The map should clearly show the extent of surface disturbance at both the main pit and the Nielson property. The report should be received by the Division no later than January 1, 1988.

During our inspection, you indicated that Western Clay has no further use for material coming from the small pit on the Nielson property. We discussed the possibility of reclaiming this site in the short term, but you noted that the private landowner would have to be contacted before a commitment could be made. Please inform us of Western Clay's intentions in this regard.

Thank you for your cooperation, and best wishes for the continued success of your operation.

Sincerely,

A handwritten signature in cursive script, appearing to read "David M. Wham".

David M. Wham
Reclamation Hydrologist
